

TRANSFORM QUICKBOOKS® INTO A SIMPLE DOCUMENT MANAGEMENT SYSTEM

STREAMLINE HOW YOU WORK AND COMMUNICATE WITH YOUR ACCOUNTANT

You already love the QuickBooks interface, why not use it to adopt a paperless system that is both simple and intuitive? With SmartVault, you get built-in organization, making it easy to attach and access documents from a variety of sources—electronic, e-mail, fax, and paper. The solution’s Web-based model provides multiple paths so all of your documents—bills, statements, contracts, e-mail and notes—are accessible anytime, anywhere from QuickBooks or from the Web-based document portal.

Another win-win? You can use SmartVault to streamline how you work and communicate with your accountant or bookkeeper. Put an end to sending documents via faxes, unsecure e-mail, shoeboxes, and snail mail. With SmartVault, you save time by scanning or simply dragging and dropping documents from your desktop or e-mail directly into the SmartVault Inbox. From there, your accountant can more efficiently process your documents directly in QuickBooks. Better workflow means you can focus on growing your business—instead of being buried in paper.

Save 10%!
Invite your accountant into your vault and save 10% on your monthly subscription

PUT SMARTVAULT TO WORK FOR YOU

Save time and money. By attaching documents directly to QuickBooks as they arrive, you can avoid paying your accountant late fees, penalties, and missed deadlines. You might even consider throwing out your expensive and bulky file cabinets.

Reduce downtime for audits. With backup documents at your fingertips, potential audits are no longer as time-consuming, costly, and painful as usual. No more late nights finding, copying, and re-filing paperwork with your accountant or bookkeeper.

Root out fraud at the source. By storing original images for bank records, checks, payroll, invoices, and other key documents directly in QuickBooks, you can more easily detect, identify, and reduce fraud internally.

Prepare for and prevent document disasters. By storing documents in a secure, off-site datacenter, you can avoid disruptions in your business in the case of disaster. Your documents are accessible anytime, anywhere from a Web browser, so you won’t experience document downtime—and can keep your business moving forward.

Avoid costly setup or implementation. Since SmartVault is a Software-as-a-Service solution, there is no new hardware investment—saving you thousands in up-front costs. SmartVault’s intuitive interface ensures that you can be up and running in minutes.

Try SmartVault free for the first month!
With monthly subscriptions as low as \$19—going paperless has never been more affordable.

1,000 documents

SmartVault TEAM

\$39/month

5 QuickBooks users
Unlimited Inbox-only users
5,000 documents

Invite your accountant or bookkeeper into your vault and receive a 10% discount on your monthly subscription.

GET STARTED TODAY!

Go to www.smartvault.com

1. Sign up for a SmartVault account. Choose the plan that's right for you. Once your account is activated and the SmartVault client is installed, you'll simply open QuickBooks and add your company file to your SmartVault account.
2. Scan and attach documents to your QuickBooks entries. SmartVault works with any TWAIN-compliant scanner, and has a unique integration with the Fujitsu ScanSnap scanners.
3. Invite your accountant or bookkeeper into your vault—and save 10%. Start sharing documents with your accountant. Remember, you'll save 10% on the monthly subscription when your accountant is invited into your vault.
4. Leverage the Inbox to easily share documents. Scan or just drag and drop documents, e-mails and notes directly to the Inbox for processing by you or your accountant—no other scanning solution is this simple!
