

## Accessing MYANet Reports for Teachers:

To access data for interim assessments, log into myanet.org and click on the “Performance Tab” from the main dashboard screen.

**Data Meeting Reports:** The “Data Meeting” reports are the best reports for teachers and leaders to drill down into students’ understanding of standards and their performance on specific items. The orange bar is the school’s data and the purple bar represents the network.

### Overall Performance:

Click on the Overall Performance bar to get a breakdown of the items by standard, average, points received, and item type. You can click on the question number to see the specific question.

#### Overall Performance

	Weighted Average:	Grade Weighted Average:
All Items	58	58

Question	Standard	% Full Credit Earned	Points Possible	Item Type
1	7.EE.1	63%	1	Selected Response
2	7.EE.1	57%	1	Multiple Select
3	7.G.1	70%	1	Selected Response
4	7.G.1	70%	1	Selected Response
5	7.G.1	10%	2	Technology Enhanced
6	7.G.2	57%	1	Selected Response
7	7.G.2	70%	1	Selected Response
8	7.NS.1	57%	1	Selected Response
9	7.NS.1	63%	1	Selected Response
10	7.EE.1	67%	1	Selected Response

Standard and Item Level Data:

By clicking on a bar for a specific standard, you can see the breakdown for each item type that was used to assess that standard. Click on the grey tabs above to get detailed information.

From here, click on a question number to see item data and distractor information.

Key questions to ask when looking at data meeting reports:

- Which standards was student performance the highest/lowest?
- What was the range of student performance across items?
- What common misconceptions did my students have (i.e. which incorrect answers were most common)?
- What does this information make me think about how I taught the standard initially and what I want to do going forward?

7.EE.1 Add, Subtract, Factor, and Expand Linear Expressions

Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.

QUESTION 10

Selected Response Item

7.EE.1

Points: 1

OBJECTIVE: N/A

QUESTION: Which expression is equivalent to the one below?

27x - 9y

A. 3(9x - 6y)

7%

Distractor: Student distributed the 3 to the 9x but added 3 and 6y to get minus 9y.

B. 9(3x - 9y)

17%

Distractor: Student factored 9 from the first term (27x), but not from the second term (9y).

C. 9(3x - y)

67%

Correct Answer

D. 27(x - 9y)

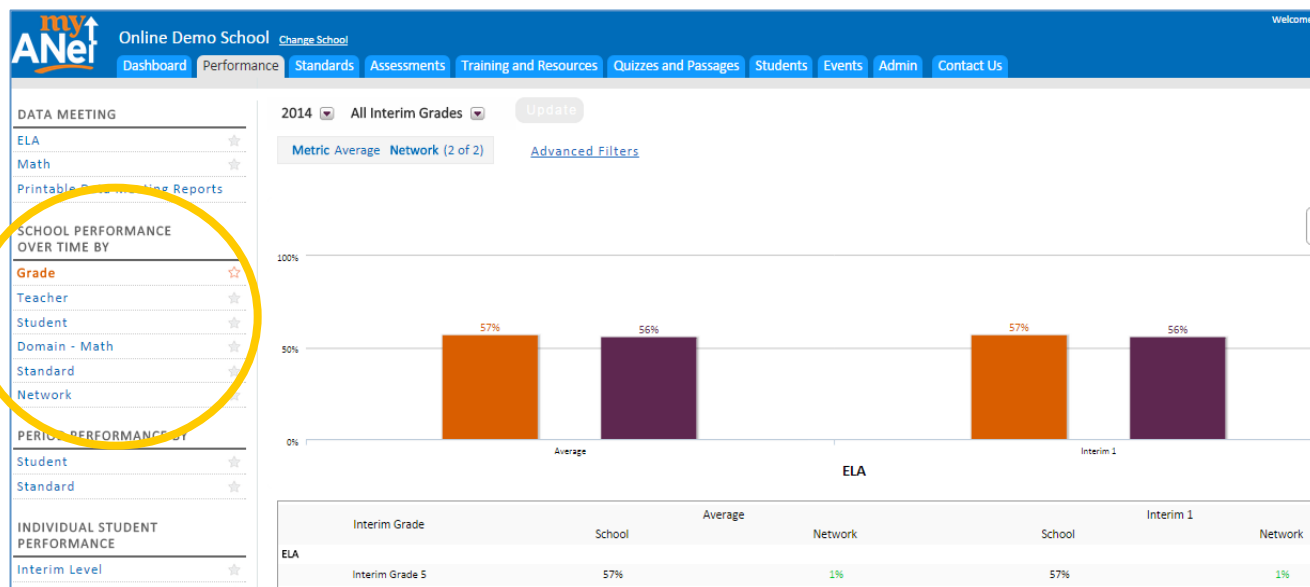

10%

Distractor: Student factored 27 from the first term (27x), but not from the second term (9y).

## School Performance Over Time Reports:

For leaders, the “School Performance Over Time” reports are a good place to start pulling out school-wide data trends for interims.

See below for descriptions of the Grade, Teacher, and Standard reports, as well as guiding questions that can be used to guide leaders’ analysis.

MY ANet Data Reports	What?	Guiding Questions
<b>Key School Performance Over Time Reports:</b> <ul style="list-style-type: none"> <li>All reports give schools the option of including a “network” comparison which can be adjusted using “Advanced Filters” link at the top.</li> <li>“Grade” and “Teacher” reports allow for data to be viewed through multiple metrics (average and percent above a given score).</li> </ul>		
Grade	Bar graphs show overall school performance for both content areas (ELA and Math) and table below shows performance broken down by grade.	<ul style="list-style-type: none"> <li>How did our school do overall? Compared to network?</li> <li>Are students performing higher/lower in a given content area?</li> <li>Are there any large discrepancies across grades?</li> </ul>
Teacher	Bar graphs show performance for each grade level and table below shows the performance broken down by teacher and/or class period.	<ul style="list-style-type: none"> <li>How did each grade perform? Compared to network?</li> <li>What classrooms/periods had the highest student performance?</li> <li>What classrooms/periods had the lowest student performance?</li> </ul>
Standard	Table shows the average student mastery for each of the assessed standards (may be filtered by grade levels or by specific teachers).	<ul style="list-style-type: none"> <li>In what domains and standards was student performance the highest/lowest?</li> <li>How did students perform on priority/focus standards that we know were taught?</li> <li>What trends do I see across grades?</li> </ul>
