

Even Democrats Admit There is a Border Crisis

A recent Fox News poll listed immigration as the most important issue facing our country. The economy was ranked second.

Illegals immigration is a national security issue. In addition to the direct economic costs, we have human trafficking, drugs, crime

and people streaming across the border undercutting wages. America is faced with an economic catastrophe and it is a national emergency. With so much political coverage on illegal immigration, even some democrats are now admitting we have a border crisis. It is time to look for real solutions as to how America can better protect our borders.

Your Mission: To encourage your representatives to get serious about fixing illegal immigration and understand a hierarchy of effective border enforcement. Learn how you can be a Citizen Patriot on the border from the comfort of your home.

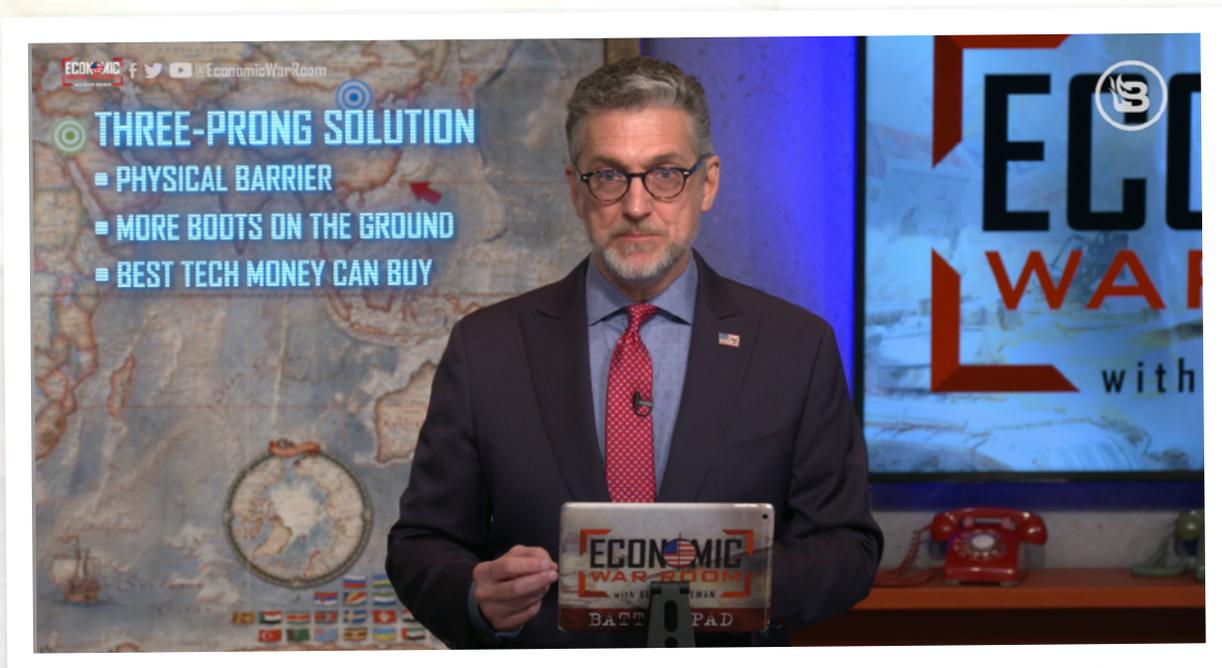

(OSINT)- Open Sourced Intelligence Briefing

Kevin Freeman brings Philip Midkiff into the War Room to talk about new technologies to secure the border.

News Flash: President Trump proposes a wall and stopping the flow of illegal immigration the Democrats are all opposed to it. They want open borders, and we know the truth. Illegal immigration is a type of economic warfare and it's hurting you.

To solve this problem, we need a three-pronged solution.

1. We need a physical barrier or some type of wall (or whatever you want to call it).
2. We need more boots on the ground. We need more people enforcing our immigration laws.
3. We need the best technology that money can buy.

The Left's agenda has changed. Why??

- In 2005, Glenn Greenwald, a left-leaning blogger wrote "Illegal immigration wrecks havoc economically socially and culturally. It makes a mockery of the rule of law and is disgraceful just on basic fairness grounds." <https://www.theatlantic.com/magazine/archive/2017/07/the-democrats-immigration-mistake/528678/>
- In 2006, which liberal economist wrote that "Immigration reduces the wages of domestic workers who compete with immigrants and the fiscal burden of low wage immigrants is also pretty clear?" His conclusion? "We need to reduce the flow of low skill immigrants." **Answer:** Paul Krugman. <https://krugman.blogs.nytimes.com/2006/03/27/notes-on-immigration/>
- "When I see Mexican flags waved at pro-immigration demonstrations, I sometimes feel a flush of patriotic resentment when I'm forced to use a translator to communicate with the guy fixing my car, I feel a certain frustration." Who said that in 2006? **Then Senator Barack Obama.** <https://www.chicagotribune.com/news/opinion/page/ct-democrats-working-class-concerns-page-perspec-0625-md-20170623-story.html>

Key Areas Needed to Strengthen our Border and National Security

A. Border Patrol and Headcount is Critical.

Our border Patrol is currently down by about 2,000 agents since the peak five years ago. President Trump would like to increase this headcount by 5,000 to patrol agents. <https://www.usatoday.com/story/news/politics/2019/03/29/border-patrol-struggling-to-hire-5000-agents-president-trump/3155869002/>

The key is not only to have “boots on the ground,” but also technology that directs agents to be at the right place at the right time!

B. A Virtual Wall and Ground Radar – Monitored by You, The People

A patented Virtual FenceSM with the public involved with monitoring and then reporting in real time. Note: This system was operating and highly successful for four years, it is no longer funded by our Government. Why??

How it Works – From BlueServo.net (A proven idea that works but needs funding to relaunch and expand.)

BlueServoSM deployed the Virtual Community WatchSM, an innovative real-time surveillance program designed to empower the public to proactively participate in fighting border crime.

The BlueServoSM Virtual Community WatchSM is a FREE service consisting of a network of cameras and sensors along the Texas-Mexico border. This network feeds live streaming video **FREE-OF-CHARGE** to the user's computer, which they can access by creating a FREE account at www.BlueServo.net. Users will log in to the BlueServoSM website and directly monitor suspicious criminal activity along the border via this Virtual FenceSM.

Citizens can sign up as Virtual Texas DeputiesSM to participate in border surveillance through this social network. Virtual Texas DeputiesSM from around the

country will monitor the streaming video from these cameras 24/7 and report any suspicious activities directly to the Border Sheriffs via email. All emails regarding suspicious activity will be submitted anonymously.

The Public, acting as Virtual Texas DeputiesSM, is limited to reporting suspicious activities via email. Local county Sheriffs will respond to these reports, conduct all investigations, and take appropriate actions. This service will provide millions of dollars in benefits to local border Sheriffs, with the public acting as additional pairs of eyes for Deputies on the ground. This extra surveillance will allow the public to directly participate in reducing crime and improving their communities. It is a well-established fact that citizen involvement in community watch programs such as this one reduces crime.

How it Works, More Details - It is as easy as 1-2-3!

1. In phase one, there are 32 military cameras covering several hundred square miles. These cameras allow you to zoom in and see what is happening along the border.
2. There are a series of buttons to control cameras, and a big red button that can be pushed if you see something suspicious and need to alert law enforcement.
3. Once you click that button, you type in what you're seeing and then Blue Servo's back end database routes the alert out the closest law enforcement. Local law enforcement local state or federal law enforcement because whoever is the closest has the best chance to respond.

The Virtual Wall Success / Interdiction Rate:

Where the Virtual Wall technology was in place, there is a **92%** success rate over a four-year average. It created thousands of interdictions of drug smugglers and human smugglers.

The average interdiction time was **5 minutes.**

This compares to Border Patrol reports they have a 78% interdiction rate with traditional border security. (Estimated interdiction rate across 650 miles of border and some types of barriers.) It also offers an opportunity for citizens to participate in border security without the threat of vigilantism.

C. Not a replacement for the Border Wall, but an enhancement.

- The cameras and sensors are very inexpensive force multiplier and just a small additional expense to the wall. It is a way to make the wall border much more effective. But none of it works without the border agents.
- A wall can be climbed but it is harder to go around a camera and a radar system (even if nothing is 100% effective).
- You especially need a physical barrier in highly populated areas. Illegal immigrants like to cross in these areas because it is easy to blend into the population. If you do not stop them in minutes, they are gone.

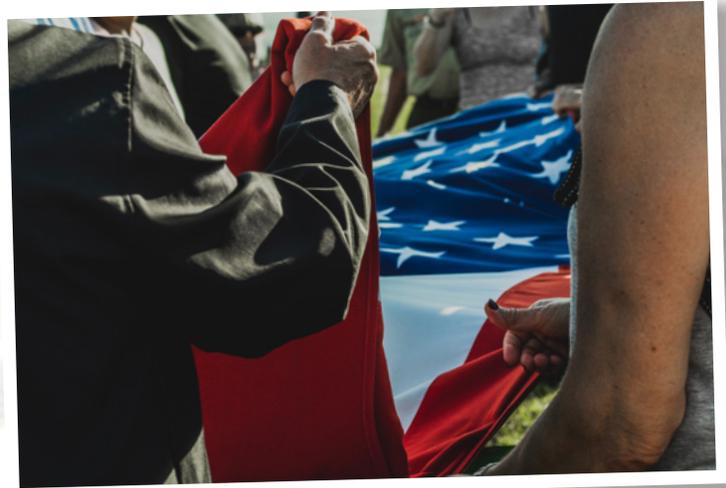

"You've got to have all of these methodologies working in layers as any military general would tell you. He needs a layered program. That's why we have the United States Marines for one mission, the Army with a different mission, and the Air Force and Navy each with a different mission."

-Philip Midkiff

D. Citizens help monitor, but civil liberties and U.S. legal authority is maintained.

First, Illegal aliens are not citizens, but criminals. Second, individual citizens only monitor and report. They are not detaining or acting as law enforcement in any way. Other considerations:

- When an illegal alien conducts criminal acts, they are not given civil liberty protections.
- This is a cost effective way for citizens to help protect our nation.
- Actual law enforcement is doing the interdiction, not the individuals.
- All citizens do is alert law authorities when something looks suspicious or not correct.
- The citizen does not even know exactly what area they are monitoring, all camera locations are kept confidential.
- It is impossible for the citizen to interact directly because they are sitting at home in Florida or Wisconsin, and you only have two minutes to notify someone before the illegals are gone.
- Both **local democrat and republican** law enforcement officials are in support of the program.

We need technology because of the force multiplier effect. That's critical because we've got to be able to direct the most limited resource, our manpower, to respond without the law enforcement.

E. Comprehensive Legal Immigration Reform Needs to be Addressed.

- Before a policy can be addressed, America and its politicians need to understand and be honest about the True Total Cost of Immigration.
- America used to be the great melting pot, with merit based, need based goals along with assimilation that ensured common goals and values of the U.S. Constitution.

“The ‘secret sauce’ is the individual patriot that gets the ultimate reality television. It could be somebody in Australia or wherever. They get the ultimate viewing because they’re watching real time what happens. And they help protect our country. So, it is the citizen patriot at work, which is what essentially founded our country.”

–Kevin Freeman

**Economic Patriots like
You Can Make A Difference!**

Why You Should Care:

1. This is an economic war that impacts your pocket book. Direct economic costs vary based on calculations but could be well over \$100 billion annually. <https://www.watchdog.org/national/analysis-illegal-immigrants-cost-taxpayers-billion-annually/article/b51222e8-8b7b-11e8-8546-37063af1f318.html>
2. Drugs, human trafficking, and even potential adversaries or terrorist from countries around the world are illegally crossing our borders.
3. It is important to understand there are places where a border wall works and is needed. There are other areas where technology can and will be more effective. The US needs a total integrated solution.
4. We are short resources on the ground, and technology can help their productivity. American citizens can help increase efficiency and effectiveness.
5. Without a secure border we will not have a country anymore.
6. Illegal immigration is an economic threat. You can make a difference!
7. We want a legal immigration system that works and is good for America.

→ In the Economic War Room, we encourage Americans to be the small ships that make the difference. You cannot rely on the government or the president to solve your problems. You have to make a difference. It is up to you to help take our country back.

Economic Patriot Action Plan

Step 1: Encourage your representatives to understand and address the true cost of illegal immigration. Send this battle plan to them and your friends as we work together for the best border security solutions.

Step 2: Restart the virtual wall funding in addition to other barrier/wall funding. We need to fund a multi-layered defense along the border. The border sheriffs that used to fund BlueServo technology no longer have their funding.

Step 3: Sign up at [BlueServo.net](https://www.blueservo.net), and they will update you with their next steps on the status of restarting this program.

Step 4: With an investment as small as 10 million dollars this project can be expanded and running. Consideration is being given to a Kickstarter or crowdfunding campaign. With American citizens on board to help, you may do more to stop illegal border crossings than congress has accomplished in the last 5 years.

Step 5: Consider what can you do now to help strengthen America. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

→ Get others to sign up and review our weekly Economic War Room [Economic Battle Plans™](#). Each of these will address critical solutions to the threats highlighted on this briefing. Subscribe to our weekly Economic War Room show on TheBlaze at [EconomicWarRoom.com](https://www.EconomicWarRoom.com).

→ Subscribe to our weekly [Economic War Room show on TheBlaze](#). We need to break the digital ghetto that is limiting free speech regarding truth and liberty.

→ Follow, like, comment and share on [Facebook](#) and [Twitter](#). [We recognize these tools may be compromised at times, but when they are not filtered, they can be major platforms available to reach out to the public.

→ Share this Economic Battle Plan™ and our short video segments on Facebook or YouTube with friends. We set up the Economic War Room to be your resource for information, preparation, and mobilization.

→ Think about ways you can mobilize or weaponize your money towards things that strengthen American. This can be through charitable giving, spending, or investments.

→ **Do this now!** Have a financial action plan based on multiple geopolitical scenarios developing now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.

→ **Talk with your financial advisor as it relates to your savings/ investments. Ensure your advisor understands the potential impact economic/geo-political scenarios could have on your portfolio. LOOK FOR ECONOMIC WAR ROOM'S ADVISOR AND INVESTOR ONLINE TRAINING COURSE LAUNCHING THIS SUMMER.**

***Thank you for accepting this mission.
Together, we will make a difference!***
