

KAJEET

How to connect to your Kajeet hotspot

#1

- Once the Computer and Kajeet are powered on.
- Log into the computer
- Then click on the wireless symbol

#2

- You will now see all of the wireless networks within range.
- The one we are looking for is the one with Verizon in it.
- Click on that one.

#3

**Click on the Verizon Option, select
“Connect Automatically”**

**You will then be prompted for a
password. Move to step 4.**

#4

Now we need to find the password off the Kajeet. If the screen is blank you can tap the power button to wake it up.

Find the wi-fi/password menu and hit the checkbox. You will now see the wireless network name and password.

#5

Now type in the password on the computer.

Once you have successfully connected you will see a brief Alert on the Kajeet.

ALL DONE!
