

Prodigy Instructions:

Go to: <https://www.prodigygame.com>

Option 1 (**Parent account linked to child. This allows for parent monitoring and assigning lessons**):

- Click on **Get your free account** (orange button).
- Click on **Parent**.
- Add your full name, email, and a password.
- Then, click on **Create Account**.

Child already has an account –

- Click on **My child already has an account**. Enter your child's username and password.
- Click **Connect Child**. This will take you to the **dashboard** where you can see your child's progress.
- To **add another child**, click on the child's name in the blue bar at the top of the dashboard and select **Add Child** to start the process again.

Child doesn't already have an account –

- Click **My child needs a new account**. Enter your child's first and last name.
- Click **Add Name**.
- Select **United States**. Under State Curriculum type in either **Texas** or **Common Core**.
- Click **Add Location**.
- Select your **childs current grade**.
- Click **Add Grade**. It will then give you're a username and password for your child. From here you can choose the number of questions your child has to answer to meet goals and if you want to receive emails.
- Keep clicking through the information until you see your **dashboard**. The dashboard is the place that your will go to check your child's progress.
- To **add another child**, click on the child's name in the blue bar at the top of the dashboard and select **Add Child** to start the process again.

Option 2 (**Child account without parent monitoring or assigning lessons**):

Child doesn't already have an account

- Click on **Play Prodigy** at the top right of the screen. This will bring up the site your child will work from.
- Click on **New Player**(Green button).
- Click on **Home** and then click **Next**.
- Choose **United States** and click **Next**.
- Choose **Texas or Florida** (Oklahoma is only available through the parent/teacher site).

- Click on the **grade** the child is in.
- Enter the **child's first name and last initial**. Then make a **password**.
- It will then give your child a **username and password**. It will go back to the home screen where you can enter the username and password and begin playing.

Child already has an account –

- If the child already has an account, then they can begin playing as they normally would.
